ABOUT ME

I am a Data-Driven UI/UX Designer and Data Analyst completing my Informatics degree. I bridge the gap between human-centered design and analytical insights, ensuring every digital experience I create is both aesthetic and empirically validated. By combining descriptive data analysis with user psychology, I transform complex ideas into strategic solutions that achieve measurable business goals and exceptional user satisfaction.

WORK EXPERIENCE

UNIVERSITAS AMIKOM YOGYAKARTA

Technical Laboratory

Sleman, Indonesia
August 2025 – Present

- Performed laboratory maintenance activities during academic breaks to ensure all equipment and facilities were in optimal condition.
- Conducted routine laboratory inspections before and after practical sessions to ensure readiness, safety, and proper functionality.
- Provided access and technical support for lecturers during teaching and learning activities in laboratory environments.
- Maintained an organized and reliable laboratory environment to support smooth academic and practical operations.

UNIVERSITAS AMIKOM YOGYAKARTA

Teaching Assistant

Computer Graphics (Informatics)

Graphic Design (Information Systems)

Sleman, Indonesia
March – Agustus 2025

- Provided direct, hands-on support to university students facing challenges in Computer Graphics and Graphic Design practical sessions.
- Effectively conducted practical sessions in the absence of the lecturer, ensuring continuity of learning and successful completion of lab objectives.
- Facilitated a productive learning environment by clarifying complex concepts and guiding students through practical exercises, enhancing their understanding and skill development.
- Demonstrated strong problem-solving and communication skills by troubleshooting technical issues and providing clear, concise instructions to diverse student groups.

PT INDOTAICHEN TEXTILE INDUSTRY

Bleaching Machine Operator

Tangerang, Indonesia
2021 – 2022

- Operated advanced bleaching machinery to transform raw textiles into high-quality, oil-free fabric, consistently adhering to strict Standard Operating Procedures (SOPs).
- Ensured product quality by meticulously verifying that all processed fabrics met specific quality benchmarks and were free of imperfections.
- Maximized operational efficiency through real-time monitoring and precise control of the bleaching process, leading to consistent output and quality adherence.
- Collaborated effectively with the production team to facilitate seamless workflows and proactively resolve any operational challenges during the bleaching cycle.
- Maintained a compliant and secure work environment by diligently adhering to all established safety protocols and hygiene standards.
